**World Development Group, Inc (WDG)** was established in 1986. The company is a small business consulting firm that specializes in health care quality management and patient safety, health information technology, decision support tools (including expert systems), and predictive modeling and forecasting. WDG serves private and public clients, as both a prime- and sub-contractor.

## **Projects**

For health care and biotechnology companies, WDG provides short- and long-term business development assistance to accelerate growth and profitability. Our capabilities include developing and evaluating strategic plans, assessing regulations, technologies, products, and markets, developing strategies for business realization, assisting in market entry and strategic partnering, improving operational efficiency, and conducting research and development.

World Development Group has completed projects for 9 federal agencies. We focus on program design and evaluation. Our current and immediate past projects include:

- Design of implementation of PL-109-41, the Patient Safety and Quality Improvement Act of 2005 (for the Agency for Healthcare Quality and Research)
- Predictive Modeling and Data Display Study (for the Centers for Medicare and Medicaid; subcontractor to Livanta LLC)
- MEDIC: Medicare Rx Integrity Contractor (for the Centers for Medicare and Medicaid; subcontractor to Livanta LLC)
- Health Information Technology Leadership Panel (for the Secretary of the Department of Health and Human Services; subcontractor to The Lewin Group).

## **Consultant network**

Our consultants offer cost-effective solutions to clients' needs. They often combine technical expertise and management experience. Our network of seasoned consultants includes subject matter experts, who have at least 20 years of relevant experience; many of whom have held such senior management positions as CEO, COO, CFO, and CIO in relevant organizations. Our consultants span the spectrum of health care quality management and technology assessment (including comparative effectiveness analysis) and disease and population management (including data-warehousing, data collection, analysis and interpretation, decision support, design of improvement interventions, and evaluation of solutions' effectiveness).
