Purpose: To enhance the transparency of reporting of genetic association studies, regardless of choices made during design, conduct, or analysis.

Focus: Report of primary research

Governance: Unknown

Finance: Grant support from Canadian Institutes of Health Research (CIHR); Institutes of Genetics and of Nutrition, Metabolism and Diabetes; Genome Canada; iotechnology, Genomics

and Population Health Branch, Public Health Agency of Canada; Affymetrix; DNA Genotek; TrialStat!; and GeneSens

Methods: A multidisciplinary group developed the STREGA Statement by using literature review, workshop presentations and discussion, and iterative electronic correspondence after the workshop. *No further information published.*

Updates: Unknown

Maintenance: Unknown

Feedback? Yes

Feedback use: To update recommendations.

Evaluation? Yes

Evaluation: Study has been completed to determine baseline for reporting of genetic association studies to enable evaluation of the impact of the guideline. A manuscript is in advanced stage of development.

Verification: Updated by publisher/organization

Date of profile: 21-Jul-10
