

WORLD DEVELOPMENT GROUP

INCORPORATED

Consulting services

World Development Group provides short- and long-term business development assistance to health care, health information technology, and biotechnology companies. We maintain a network of senior health care executives and professionals who are available to solve clients' business problems. The consulting practice leader is Peter G. Goldschmidt, MD, DrPH, DMS. He has more than 30 years of experience in management consulting and creating, managing, and developing health-focused businesses. His substantive expertise includes various aspects of health care quality management, health information/expert systems, and decision support technology/tools.

Consulting discriminators

World Development Group provides:

- Senior consultants (with at least 20 years of relevant experience); many have held such senior management positions as CEO, COO, CFO, and CIO in relevant organizations. They:
 - Perform the work for the client
 - Are broadly experienced in their areas of competence
 - Couple management experience with technical expertise.
- Purpose-selected engagement teams, with client's needs matched carefully to consultants' experience.
- Cost-effective solutions to clients' problems — we avoid the considerable overhead costs associated with traditional bricks-&-mortar establishments.

Consultant network

World Development Group:

- Maintains in a network of expert consultants.
- Adds to the network only those consultants who meet our qualifications and experience criteria.
- Updates its database of consultant information to facilitate matching client requirements' to consultants' experience.
